Fly, 1666.

Of the Eclipses this year.

THere will be four Eclipses this year, two of the Sun, and two of the Moon, but of these four we in England shall only see the one of them, which will be of the Sun upon the twenty second day of June in the afternoon.

A description of the four quarters of the Year.

The first quarter begins when the Sun enters into the first point of Aries, which will be the 10. day of March, at 5. a clock in the morning.

The Summer quarter.

Begins at the time when the Sun enters into the first point of Cancer, which will be upon the 11 day of June, at 8. of the clock in the morning.

Autumne quarter.

Begins at the time when the Sun enters into the first point of Libra, which will be upon the 12. day of September 43. min. past 11. at night.

The Winter quarter.

Begins at the time when the Sun enters into the 1. point of Capricorn, which will be upon the 11. day of Decemb. 27. past 11. in the morning.

Rules concerning Husbandry.

WHen you would Plant or Graft, consider where the windbloweth, if it be in the South it is very good for that purpose, but if it be North or East it is not good.

It is good to plant or graft generally the Moon encreasing in these signs, Taurus or Aquarius, in the beginning of the Spring, or latter end of Harvest.

Plant trees for continuance, when the Moon is in Taurus Leo, or Aquarius.

Cut timber to have it sound in December or January, in the

the wane of the Moon in Aquarius or Pisces.

Prune trees and pull off the moss in the moneth of Febr.
Plash hedges, and Lop trees for Fewel, that the heads may
the sooner grow again, when the Moon is in Aries or Libra,
and in her increase.

Set young Quicksets from September to March.

Remove young Trees in the last quarter of the Moon,
when she is in Aries, Libra, Scorpio, and in these Moneths,
September, November, February.

Set Vines in February, March or September, especially the
Moon in Aries, Libra, Scorpio, in her increase.

Set Rose trees in the midst of February, the Moon increasing.

Cut or prune trees in March or April, the Moon in Tan-
cus, Virgo or Capricorn.

Gather fruit, as Apples, Pears, and the like, at the full Moon
the afternoon, the weather being fair and dry.

Cut down Hay presently after the full of the Moon.

Dung ground to prevent growing of weeds, the Moon de-
creasing.

Sow Carrot-seeds about the end of February, or the be-
ginning of March, the Moon increasing. Also sow Onions, and
Leeks in February or March, at the wane of the Moon.

Sow Cucumbers and Melons in February or March, or
June, in a hot and fair day.

Sow Parsley, Fennel, and Anniseed, in February or March,
at the full of the Moon.

Sow Margerum, Violets, Time, Rosemary, and Lavender,
in February, March, or April, in the increase of the Moon.

Sow Gilliflowers and Wall-flowers in March or April, in
the old of the Moon.

Sow Hyssop and Savory in March, when the Moon is old.

Sow double Marigolds in February or March, in the in-
crease of the Moon.

Shear Sheep at the increase of the Moon.

The best time to Geld cattle the Moon being in Aries,
Sagittarius or Capricorn.

Of Blood-letting, and some other Physical
Observations.

In youth let blood from the change to the first quarter, in middle-age, from the first quarter to the full. In elder years from the full to the last quarter. In old age, from the last quarter to the change. But know, that under the age of 14, and above the age of 56, it is not good to bleed at all.

Again, in the Canicular, or Dog-daves, it is very hurtful to take any blood at all, unless there be great need, and indeed necessity hath no law: Therefore in such a case, the disease being desperate, the cure must be adventured.

Take a purgation when the Moon is in Aries, or Fertile aspect with Venus, decreasing in any of these three Signs, Cancer, Scorpio or Virgo, and it will be sure to work the better, because when a most Planet, in a most Sign hath such an aspect, the humours in the body are then stirred up into motion, and so the better purged out, wherefore in this case, it cannot be amiss to prepare humours by something that is laxative: and let this be done whilst the Moon is either in Gemini or Libra, or Aquarius.

Take a vomit that it may work thoroughly, when the Moon is in Aries, Taurus, or Capricorn: and know that the aspects of the Moon with Saturnus, or Mars, or the Moon in Leo, ought to be eschewed in the taking of Medicines.

Finally, if necessity urge no less, these observations are expedient: for it is a plain truth, that the change of weather upon differing aspects, doth greatly change and alter mens bodies.
